 **LABELS:**

BIOLOGICA

Located in Sardinia on the gulf of Asinara natural park **Palma d'oro** produces stone bass and sea bream on the site of the beautiful world known Pelosa beach. The sea farm is located offshore 4 km away from the coast line and close to the village of Stintino which is notorious for its ancient tradition of red tuna fishing (tonnara). The exceptional quality of the environment and our know-how are the fundamental assets upon which we base our pursuit of excellence in the field of aquaculture.
